

SmartLocations

The WyldLynx SmartLocations product enables users to successfully manage the large numbers of locations that arise when dealing with organisational-level content management systems.

WyldLynx

Linking Business & Technology

Features and Functionality

- ✓ Easily find and convert unknown locations
- ✓ Identify any locations not related to a valid organisation and automatically relate
- ✓ Identify duplicates and merge them with the click of a button
- ✓ Discover locations without attached records preference
- ✓ Incredibly fast and efficient

“ I had no idea my CM was in such a mess until I used SmartLocations. I'm so glad that it didn't just point out the issues, it saved me time and helped me fix them! ”

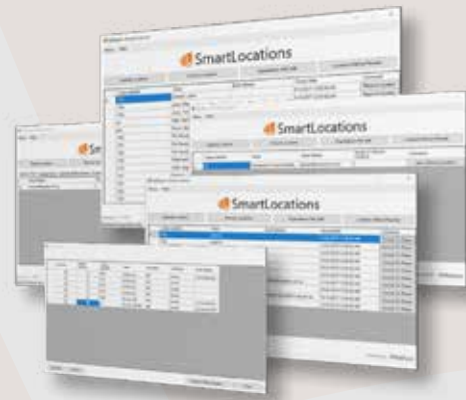

User Feedback

Using SmartLocations

Take away the pain of managing locations from within Content Manager.

Just a few clicks of a button and all of your location management dreams can come true.

Well organised locations within CM makes everyone's lives easier, and provides richer functionality in the system for your team.

Requirements:

- Microsoft Windows 7, 8 or 10
- Content Manager 9.1+
