

Information Security

The WyldLynx Information Security Initiative has been designed to keep you up to date with the latest issues effecting your information security. Are you fully aware of how information is flowing through - and out of - your organisation? Is it secure along the entire pipeline?

SECURITY SERVICES

- ✓ Incident Response Management
- ✓ Info Security Awareness Training
- ✓ Deployment of solutions to aid in identifying PII and info security risks
- ✓ Security and Risk Audits
- ✓ Confidential consultations on Financial and cyber-crime investigations

“ With so many different hacks and scams reported on the news these days, I didn’t know what I should be worried about. WyldLynx explained what I did and didn’t need to look at, and kept me up to date with what I actually needed to know. I feel much safer now. ”

User Feedback

Using Information Security

Security is not a switch you can turn on and off. Good security must walk the line between accessibility and safety.

It is often the little things that a business user does that can open an unintended door to the outside world.

WyldLynx Information Security can help to close those holes for you.
